

ACCESSORIES FOR BMW F 900 XR

STORAGE

TOURING CASES

With a volume of approx. 31 litres on the right and 32 litres on the left, the high-quality hard shell touring case offers ample space for luggage. The splashproof case with painted lid can be locked and is the perfect travel companion for short or longer tours.

Available in Asphalt grey metallic matt, Granite grey metallic matt (not shown), Light white and Racing red.

For information on speed and load restrictions, please refer to the operating instructions.

1 Touring case in Asphalt grey metallic matt

2 Touring case, Light white

3 Touring case, Racing red

LINER FOR TOURING CASE

The matching liner for the touring case gets the luggage organised and facilitates loading and unloading. The liner is readily available and easy to carry thanks to the carry handle and shoulder strap. Functional details include the three-sided zip fastener and separate net compartment in the lid.

CASE HOLDER

The sturdy case holder allows easy and secure installation of the touring case. Even if the case is not mounted, the discreet black holder is hardly noticeable on the bike.

SOFT CASE

The high-quality soft case made of durable polyester convinces with practical details and a storage volume of 20 litres (total volume of left soft case and right soft case). Features such as the waterproof liner, the all-round zip, the carrying handle and the quick-release fastener for easy mounting on the motorcycle ensure a secure hold and practical handling.

SMALL TOPCASE, 30 L

The waterproof plastic topcase offers enough space for a helmet with a volume of 30 litres. The lid, which is available in Asphalt grey metallic matt, Black storm metallic or Light white, and the soft-close hinges, which allow the lid to be lowered gently, underline the high-quality appeal.

Only in conjunction with luggage carrier, topcase carrier and corresponding outer shell. For information on speed and payload limitations, please refer to the installation/operating instructions. For more detailed information, contact your authorised BMW Motorrad Retailer or go online at bmw-motorrad.com.

LINER FOR TOPCASE

The matching tailored liner for the topcase gets the luggage organised and facilitates loading and unloading. The carry handle and shoulder strap make the bag easy to access and transport. Practical details include the external patch pocket and the three-sided all-round zip.

LARGE TANK BAG

The tank bag, made of durable polyester fabric, offers many intelligent details. Its volume can be extended from 11 to 16 litres as required. Extra space is available in the map pocket and exterior pockets. The smart belt fastener design guarantees a secure hold and extremely functional handling.

Original BMW Motorrad equipment is available from your authorised BMW Motorrad Retailer.

SMALL TANK BAG

The small, durable tank bag with belt attachment is the ideal companion for short trips. The main compartment with removable waterproof liner, the cable duct, the storage space volume of 5.5 litres, the carry handle and the removable shoulder strap are handy qualities that leave almost nothing to be desired.

LUGGAGE CARRIER

A topcase or other pieces of luggage can be easily and securely attached to the sturdy luggage carrier made of powder-coated die-cast aluminium. Since the luggage carrier is attached to the motorcycle in a vibration-free manner, the riding characteristics improve noticeably with the topcase mounted, especially at higher speeds.

DESIGN

OPTION 719 SILVER MIRRORS

The Option 719 silver-coloured mirrors are made of milled aluminium and highlight the high-quality character of the bike. The low-vibration construction and aerodynamic shape ensure excellent visibility. The attractive design also creates a strong individualisation effect.

ADJUSTABLE RIDER FOOTRESTS

The rider footrest made of black anodised aluminium combines a dynamic look with ergonomics and sportiness at the highest level. Thanks to the ribbed tread surface and three-step height adjustment, it provides additional support and optimum vehicle control.

FOLDABLE HANDBRAKE LEVER AND CLUTCH LEVER

The handbrake lever can be adjusted in five positions for the preferred grip range and, thanks to the folding mechanism, has a defined folding moment.

The clutch lever can be adjusted in three positions for the preferred grip range and, thanks to the folding mechanism, has a defined folding moment.

To be fitted and/or enabled in a specialist workshop, ideally at your authorised BMW Motorrad Retailer.

HANDBRAKE LEVER AND CLUTCH LEVER PROTECTORS

The clutch lever protector also makes a clear statement of uncompromising sportiness on the road. The curved bow made of aluminium and plastic protects the clutch lever on the handlebars from being unintentionally actuated due to contact with another vehicle or damaging the bike if it falls over.

The handbrake lever protector protects the handbrake lever from accidental contact while riding and also if the bike falls over.

ENGINE SPOILER

The elegant three-part engine spoiler made of shatterproof and UV-resistant plastic ensures an individual sporty look. The side sections, painted in Granite grey metallic and Racing red create a striking visual accent.

1 Engine spoiler, Granite grey metallic

2 Engine spoiler, Racing red

ERGONOMICS & COMFORT

WINDSCREENS

The tinted windscreen emphasises the sporty look of the motorcycle. The scratch-resistant coating ensures long-term unimpeded visibility. The dimensions and shape are identical to those of the standard version, which means that the windscreen also offers good wind and weather protection.

The Sport windscreen in clear glass is approx. 20mm shorter than the standard windscreen and highlights the sporty look of the bike. The windscreen was developed in the BMW wind tunnel and offers good wind and weather protection even at higher speeds. The scratch-resistant coating ensures long-term unimpeded visibility.

HEATED GRIP RETROFIT SET (NOT SHOWN)

No more cold hands: This is ensured by the electric heating grips with multi-stage control. The grips enhance comfort and offer more safety, because it is easier to control the vehicle with warm hands and more feeling in the fingers. The heated grips are conveniently operated via a multifunction switch on the handlebars.

For more detailed information, contact your authorised BMW Motorrad Retailer or go online at bmw-motorrad.com. To be fitted and/or enabled in a specialist workshop, ideally at your authorised BMW Motorrad Retailer.

CRUISE CONTROL RETROFIT SET (NOT SHOWN)

The electronic cruise control can be activated from 30km/h and keeps the driving speed constant. This makes it possible to enjoy longer motorway stretches in a relaxed style. The function is deactivated on braking, and the selected speed is automatically adopted after activating the resume button.

LOW-SLUNG (NOT SHOWN)

The changes in the chassis resulting from the lowered suspension reduce the vehicle height and the seat height. This means that even smaller riders can enjoy improved stability and have better control over their machine when manoeuvring.

SEATS

The comfort seat with additional padding offers noticeable benefits in seating comfort and therefore even more carefree miles, especially for tall riders. The seat height is higher compared to the standard seat. Thus even long daily stages can be enjoyed in a relaxed style and without fatigue.

The low seat makes it easier to get on and off and improves ground accessibility. Many riders feel safer thanks to the reduced seat height, because they can manoeuvre and control their motorcycle more easily. The high-quality surface material in black corresponds to the standard equipment.

1 Comfort seat

2 Low seat

CENTRE STAND

The stable centre stand ensures a safe stand for the motorcycle even on slopes and offers advantages, for example, when refuelling, mounting cases and topcases or checking tyre pressure. The motorcycle also takes up less space when parked upright.

SHIFT ASSISTANT PRO (NOT SHOWN)

The shift assistant Pro allows shifting up and down in almost all load ranges and engine speed ranges without clutch control. The assistant thus ensures noticeably reduced shifting times, a relief of the clutch hand and thus more comfort, dynamics and riding pleasure.

To be fitted and/or enabled in a specialist workshop, ideally at your authorised BMW Motorrad Retailer.

NAVIGATION & COMMUNICATION

BMW MOTORRAD NAVIGATOR VI

With the multifunctional Navigator VI, route planning becomes child's play. The system with 16GB flash memory and a five-inch touch screen always shows the right way. Thanks to the circular polarisation filter (CPOL), the waterproof display is easy to read even in direct sunlight. The high-resolution screen in a casing similar to a smartphone provides all the essential information and ensures that you can see the big picture required in every situation. Numerous additional functions make planning and touring an exciting experience. Plan your routes can be created according to your personal preferences and enjoy driving on winding and quiet side roads. In unknown terrain, the "round trip" option is a good choice as it reliably guides the rider at the end of the tour back to the starting point. The Bluetooth connection to the BMW Motorrad communication system and the optional Smartphone Link app enable multimedia on the go: navigation announcements, telephone calls and music streaming as well as the retrieval of weather forecasts or traffic jam information are no problem. Navigation preparation adds further functions such as "My Motorcycle", and the multi-controller on the handlebars offers an alternative control option. Choose the pre-installed map data, and you will always be up to date with lifelong, free map updates.

Note the differences in national-market versions. Only available in conjunction with OE navigation preparation.
Not available in conjunction with the smartphone cradle holder or handlebar risers. To be fitted and/or enabled in a specialist workshop, ideally at your authorised BMW Motorrad Retailer.

NAVIGATION PREPARATION RETROFIT SET (NOT SHOWN)

The retrofit set includes navigation preparation with Multi-Controller, holder and Mount Cradle for the navigation device. This allows the BMW Navigator to be neatly integrated into the cockpit in the rider's direct field of vision. The system is secured against theft and can be operated via the Multi-Controller on the handlebars.

Original BMW Motorrad equipment is available from your authorised BMW Motorrad Retailer.

BMW MOTORRAD SMARTPHONE CRADLE

BMW Motorrad's robust Smartphone Cradle provides a safe and protected place for your smartphone. This means that useful functions such as navigation instructions and online information can also be used while you are on the move. Thanks to the handy charging function, your smartphone is always ready for action even on extended bike tours.

Only available in combination with bracket for BMW Motorrad navigation devices. Not available in conjunction with preparation for navigation device or handlebar risers. To be fitted and/or enabled in a specialist workshop, ideally at your authorised BMW Motorrad Retailer.

SAFETY

HAND PROTECTORS

The hand protector, made of impact-resistant and UV-resistant plastic, also protects the operating elements against branches and stone chips while riding off-road, and is aerodynamically tailored to the vehicle. On the road, the wind and weather protection offered by the protectors is also impressive: hands and fingers stay longer dry and warm even at low temperatures.

To be fitted and/or enabled in a specialist workshop, ideally at your authorised BMW Motorrad Retailer.

ENGINE PROTECTION BAR

The electropolished stainless steel sturdy engine protection bar reliably protects the engine housing against damage from the bike falling over or in the event of a fall without compromising the lean angle. It blends perfectly with the bike's design.

LED ADDITIONAL HEADLIGHTS

The powerful LED additional headlights extend the illumination to ensure the required vision in poor visibility conditions—perfectly complementing the headlight. LED technology ensures virtually wear-free operation.

To be fitted and/or enabled in a specialist workshop, and ideally at your authorised BMW Motorrad Retailer. The additional headlights are approved for use as fog lights, and may only be used in poor weather conditions. Country-specific road traffic regulations apply. K09: Only available in conjunction with OE seat heating.

PROTECTIVE GLASS FOR 6.5-INCH TFT DISPLAY

The protective glass reliably protects the 6.5-inch TFT display from dirt, flying stones and damage. The hardened glass has an anti-glare and anti-reflective surface, so that the TFT display can be read easily. With BMW Motorrad inscription.

FSC ENGINE DRAG TORQUE CONTROL (NOT SHOWN)

The engine drag torque control (MSR) reliably prevents unstable riding conditions that can occur during overrun mode or when shifting down due to excessive slip on the rear wheel. In this case, MSR increases the engine torque by opening the throttle valves to reduce slip and stabilise the motorcycle.

ANTI-THEFT ALARM SYSTEM RETROFIT SET (NOT SHOWN)

Strong protection from theft: If the motorcycle is moved or struck violently, the anti-theft alarm system responds with a clearly audible signal and a flashing warning light. The acoustic and optical warning will draw the attention of passers-by quickly. The alarm system is activated automatically when the ignition is switched off.

Note the differences in national-market versions. To be fitted and/or enabled in a specialist workshop, ideally at your authorised BMW Motorrad Retailer.

RETROFIT SET FOR TYRE PRESSURE CONTROL (NOT SHOWN)

The tyre pressure control with all its functions can be retrofitted by installing the control unit. TPC provides reliable information about the current tyre pressure and warns the rider about pressure loss at an early stage. The corresponding notifications and instructions are provided by the on-board computer in the cockpit.

To be fitted and/or enabled in a specialist workshop, ideally at your authorised BMW Motorrad Retailer.

MAINTENANCE & TECHNOLOGY

OUTPUT REDUCTION 35 kW / 48 HP (NOT SHOWN)

The power reduction retrofit to 35 kW (48 hp) is an attractive option for beginners and returning riders. This leaves nothing to be desired when it comes to riding pleasure and feeling. The engine can be brought back to its full power later on, if desired. The power reduction is carried out by means of an enabling code.

Original BMW Motorrad equipment is available from your authorised BMW Motorrad Retailer.
